

# Equipment Available for Shoots at Studio 10

All of our equipment is in pristine condition, and is for use onsite at Studio 10, most of which is included in studio rental fees.

*NB - If any gear is requested offsite, Studio 10 Grip/Gaffer will be required to be hired with gear, and day rate for same will be added to rental costs.*

### Product Photography / Video;

			<p><b>Turntable</b> - 42cm diameter, can support up to 100kg Four coloured covers cut to size and shape available, (or make your own) Remote control, with speed control, reverse, or degrees of rotation selection Quiet operation</p>	15
			<p><b>Prop Wax</b> - invisible support for small items</p>	15 for 6g box 5 per stick

### Daylight / Blackout Setup;

			<p>Both studios have very large South facing bay windows with diffusion scrim ready for use, turning the windows into massive softboxes, both rooms also have optional roller blackout blinds fitted. Additional blackout drapes are available for either space on prior request.</p>	
<p><b>ND Filters on window</b></p>			<p>Neutral Density filter film can be fitted to the window on the second floor if using daylight setup, in order to reduce light coming in through the window which allows window to be included in shot. Film is 4ft high, and the blinds can be dropped to this height to cover the top part of the window which is not covered by film.</p>	50

**Sound Reduction;**

			<p>Despite the City Centre location, the big old building that is Studio 10 is surprisingly quiet inside. If recording sound, you will be recommended to use the second floor space, as this has carpet and a better acoustic for such. If required, the second floor studio space can be set up to further reduce sound by an additional four decibels (only when using blackout) - by prior request.</p>	50
